Specialty: Industrial Power Supply

Diploma: Specialist (Incomplete)

Experience

Dec-2015 - Till now (Jun 2018) - Senior Frontend Developer at EPAM Systems:

- Building UI of several applications for foreign customers. On previous project playing role of key developer and leading team of 4 frontend developers. Occasionally conducting technical interviews and giving tech talks at frontend community meetups.

Latest Project technology stack:

- Angular 6, TypeScript, RxJS

The one before that:

- AngularJS 1.5, ES6, NodeJS

Practical experience with React, Redux (only on pet-projects)

Nov-2014 - Nov-2015 Fullstack Developer at LightSoft Research (remote)

- Working as fullstack developer building service that allows users to find and book best package tours, building TourmanagerPRO - app for automation of tour operator business processes.

Technology stack:

- PHP 5 (Symfony Framework), PostgreSQL, AngularJS

Oct-2013 - Nov-2014 Fullstack Developer at web-studio LOGIKA

- Starting point in my career as a web-developer. I was building web sites on Wordpress platform and some other CMS.

Technology stack:

- Vanilla JavaScript, jQuery, PHP

Open Source

I contribute to open source projects from time to time. Last year, for example, as part of annual Hacktoberfest event, two my pull-request with bug fixes were merged into [Microsoft/vscode](#)

Among other popular repositories that I've contributed to:

- [Desktop Player for Google Play Music](#) electron app written in React.
- [Angular UI grid](#)

Programming Languages

JavaScript: (but I prefer TypeScript)

GitHub: [dKab](#)

Languages

- English (B2+)
- Russian (native)

Hobbies

- Photography
- Hiking
- Bicycle
- Currently I'm part-time student (evening) at ITMO University getting CS bachelor degree.
